

Reference: Yuvarasen (Yuven) Gounden

Dear Sir/Madam

I met Mr Yuven Gounden during his tenure at the South African Health Products Regulatory Authority (SAHPRA) in my capacity as a advisor to the agency for capacity development activities. He supported our work by thinking through, preparing and following up on communications aspects related to the project.

Here follows some links to examples of work that was done by Yuven and his team in our collaborations together:-

- A think-tank convening event (virtual). Check this [LINK](#) to report on the SAHPRA website
- 2 x 2-hour hybrid (virtual plus face-to-face) meeting as side meetings to the World Conference on Pharmacometrics. Check this [LINK](#) to report on the SAHPRA website
- Graduation events for a University course for Clinical Assessors. Check this [LINK](#) for the output.

All these events had high visibility with the global scientific community. Yuven's work with his team was exemplary. He is pleasant to work with, has a wonderful warmth of character and ensures good completion and follow-through. It is also clear that all who work with him have huge respect for his ideas and implementation tactics. This comes from his sound professional training and extensive experience across multiple disparate sectors.

It is my pleasure to recommend him to you and will be available in case you have any questions.

Yours sincerely,

Colin Pillai PhD
